

W/B - 18th January 2021.

Electrical sources - Science

Starter:

<https://www.stem.org.uk/resources/elibrary/resource/30647/things-use-electricity>

This week there is a great video lesson we can use made by STEM. They specialise in lessons in science and technology. Watch the video lesson and pause the screen when you're set work or have an experiment to complete. During this lesson there are several different activities and worksheets to have a go at. You don't have to do every activity, choose which ones you would like to do, just make sure you complete at least two different tasks during the week. I would suggest splitting your activities over two afternoons.

Below is the link to the lesson. The worksheets are attached underneath this file. Please take any pictures of your experiments and send me any finished worked you're really proud of. Be great to share our science investigation during weekly Feedback. Enjoy!
