

Week commencing Monday 25th January 2021

OLI: To test and identify which materials have certain properties.

Steps to success:

- I can identify which materials the objects are made from.

- I can test materials to see how they behave.

- I know the material that an object is made can often explain how a material behaves.

Gently test the objects to see if they are bendy or not, write what the object is made from and then put a tick in the right box.

Object	Material/s object is made from	Bendy	Not bendy
 straw			
 spoon			
 table			
 Cup			
 elastic band			

What did you find out? Think about the material the object is made from.
